SANDOS HOTELS & RESORTS RECEIVES THE TRAVELIFE GOLD CERTIFICATE

Sandos has received the Travelife Gold Certificate for all its hotels in Spain and Mexico. This certificate is one awarded to hotels offering sustainable accommodations.

Another year, Sandos Hotels & Resorts renewed its sustainable accommodation seal awarded by the Travelife international certification program, thanks to its commitment to social responsibility and its actions to reduce negative environmental impacts.

A few of the various measures in all the hotels that aim to reduce their ecological footprint and demonstrate their concern for the planet are the installation of solar panels, waste management, the presence of recycling points in the hotels, reduction of single-use plastics, the display of informative posters, awareness about recycling, and the reduction of electricity and water consumption in all facilities.

The hotel group stays constantly committed to offering the best services, amenities, and accommodations for guests while also promoting the importance of caring for the environment. After a thorough audit of each of the establishments, they met the Travelife requirements, which allowed them to obtain the certificate and, in turn, the sustainable establishment seal. This seal is a guarantee that when clients choose any Sandos resort, they opt for an ecologically respectful hotel.

With ongoing proper resource management and sustainable policies, Sandos Hotels & Resorts will continue to make a difference in the hotel industry.

Sandos Hotels & Resorts is a leader in creating innovative and sustainable all-inclusive resorts. The brand includes a collection of properties in Spain and Mexico. It prides itself on providing exceptional service, quality accommodations, unique cultural programming, and extraordinary value for guests while maintaining a deep commitment to the environment. With a broad portfolio of properties, the brand features different experiences offering vacations that range from upscale getaways and relaxing retreats on the world's most spectacular beaches to eco-friendly getaways.
